

FAQ & Troubleshooting Sample

Disclaimer: I adapted this sample from work I created for a previous employer. I removed all proprietary, confidential, and identifying information, and I rewrote portions of the content to ensure it is neutral and appropriate for public use. The original material belongs to that company. I provide this sample solely to demonstrate my writing ability.

All company names, product names, and scenarios in this sample are fictional and used solely for demonstration purposes.

This FAQ and troubleshooting sample reflects my approach to diagnosing common user issues and delivering clear, actionable resolutions.

GivingBridge FAQ and troubleshooting

This page answers common questions about GivingBridge configuration, data management, and system behavior. Administrators and staff can use this information to resolve issues and understand how GivingBridge processes data across modules.

Frequently asked questions

The following questions cover common setup issues. Review them before you contact your SilverTurnip Technologies representative for assistance.

Why does GivingBridge prevent me from awarding a premium to a constituent?

GivingBridge blocks the award when the constituent has reached the premium's maximum times awarded limit or when the months until reassignment period has not elapsed. Review the premium's configuration to confirm the limits you defined.

Why does a premium not trigger a low-inventory alert?

Low-inventory alerts require three conditions:

- Inventory tracking is active for the premium
- A value exists in **Quantity in Warehouse**
- A value exists in **Notification Amount**

If any of these values are missing, GivingBridge does not generate alerts.

Why does the person stage indicator not update automatically?

GivingBridge updates the total number of days in a stage immediately, but it updates the stage status (Normal, Warning, Overdue) only when the stage workflow runs. Schedule this workflow to run daily to keep indicators current.

Why can I not edit a stage time range?

Each stage supports one time range. If a range already exists for the stage, GivingBridge prevents duplicate entries. To update the range, open the existing record instead of creating a new one.

Why does GivingBridge reject outbound transmissions?

Outbound transmissions fail when authentication settings are incomplete or incorrect. Confirm that the **Endpoint URL**, **Authentication Method**, and **API Key** or **Token** fields contain valid values. If the external system recently changed its endpoint, update the **URL** in GivingBridge.

Troubleshooting

Issue:

Premium inventory does not decrease when staff award a premium.

Cause:

Inventory tracking is not active for the premium.

Resolution:

1. Open the premium record.
 2. Enable inventory tracking.
 3. Enter values for **Quantity in Warehouse** and **Notification Amount**.
 4. Save the record.
-

Issue:

GivingBridge does not send scheduled outbound transmissions.

Cause:

The transmission window does not include the current time.

Resolution:

1. Open the outbound transmission settings.
 2. Review the **Transmission Mode** and **Transmission Window** values.
 3. Adjust the window to include the desired time range.
 4. Save the settings.
-

Issue:

Staff cannot assign a premium to a person.

Cause:

The premium reached its award limit, or the reassignment period has not elapsed.

Resolution:

1. Open the person's premium history.
 2. Confirm the last award date.
 3. Compare the date to the premium's **Reassignment Month** value.
 4. Adjust the premium's limits if institutional policy allows.
-
